Tall turiness letters should be addressed to fourtile brothers, and communications intended to publication should be addressed. "Editor of Whig and Courièr."

WEDSESDAY, DEC 4, 1895

Cleveland on Cleveland is m I he President's message presented to ougress Tuesday and printed in full in this issue of TEL Willia, is devoted almost exclusively to a discussion of two questions our foreign relations and the aurrency. In dealing with the former he tells the country nothing not known before! Indeed in this respect it is the wealest document that one could con-"vices here and entered our "protest" there, test so far as actual accomplishnent is concerned, it is beyond the powand the l'resident to designate any par-I'cular neident having an interest for the American people where this Government is doing much of anything besides praying the role of a patient waiter for an account to some communication ad-

dressed to foreign powers.

Wifen it comes to the flusheral part of the message the Pres dent turns himself hose in the manner tout has been forehadowed A new scape-goat was necessary and this time it is the poor \_menback Not long once it was the sherman silver law It will be recalled low the President at that time attributed cach and every ill of the country to the of which was going to regulate the nuclinity of the Government and of the wheels of a re-perity revolving once more The law was repealed, but the michini continued to run hard and sofor 1- the people were concerned they could not tell the difference. It served for a time, however as a convenient s abe goal and now the greenback is bemg pre-sed into the same service . { More who reads the message care-

fully can fail to see that the President was aboring hard when he wrote if, to had in fact that the document riself furrishes in several instances, proof of the lucousistency of his own argument when he nudertakes to show that the Jenest breeding tariff law is not responsible for the deplorable condition now existing in the Treasury Department. In one N CKEL ALARM CLOCK thatable at least he is guilty of a deliberate ini-statement when he says that the last il epublican tariff law was "insetificient for the purpose of revenue". It not or by supplied the Government with FINEST FRENCH CLOCKS revenu sufficient to meet all its obligatrons, but the last Republican Administritton decreased rather than increased the public debt as his Administration has done. The histoknown of a deficit in the Ireasury was in the fiscal year from July 1 1928, to July 1, 1894, during which year the Cleveland Administration

wis in full control of every branch of the Got rument, pindged to reverse the prosective policy of the past thirty years Then and not until then, did the denoralization of the country begin and the resonues of the Covernment cease in adequate to meet its expenditures The President, inadvertently no doubt, but nevertheless explicitly, admits the fact when he tags, speaking of the gold reserve "No April, 1893, for the first traie si ce its establishment, this reserve There had been no worry over the gold reserve under a lapublican Administra-

amounted to less than \$100,000,000. hon, reither was anything heard of any serious ills atising from the greenoack currency. What then caused this sudden as pearatice of towards distrust in 184 Cleyclandism Wilsonism, and from min surforphined. They were the men in Charge and distrust and business consternation immediately followed: The record is perfectly clear and speaks for Heat Democrate and disaster go hand

He iresident again trips himself when he sars If our gold, reserve had never been impaired, of no bonds had LYNCH'S, EXCHANGE STREET. been issued to replenish it, if there had teen no fear and transity concerning our ability to continue gold payments

the amount of our revenues But unfortunately all the unturnstances that might lend weight to this consideration are sutirely lacking But the very conditions pointed out by the lifes dent are the creation of his wu fully | They did not exist when the bovernment was supplied with sufficient will it as I was prior to that fatal year 1893 the first Gleveland year backed by a Democratic Congress, and will cease to exist ouceitne law of "perhaly and dishonor 'is replaced by a law that will not only furnish the necessary geverue, but re-establish business corfidence The President is offering a remedy for an imaginary ill, instead of attering the pasient for the sole cause of his trouble

In dreaming the silver question the tresident takes strong ground until he sports it by suggesting the colunge of the seagthorage, or as an emment Democraf designated it - the comage of a duum, just as he spoils his reference to the extension of the tirculation of the ational list ke by coupling with it an dvocacy of State Ranks and a return to the days of wild-ent currency. The message is nothing more or less than a wordy attempt to turn' public attention away from the disturbing effects of a tariff law which even the President does not pretend is furnishing now, or is hable to furnish in the near futu e, revenue enough to discharge the hopest blightions of the Government. It is the fully of Congress to supply this desiciency and we do not apprehend that much attention will be paid to the financial recommendations of President

industries, and change the balance of trade in our favor."

Nelson Dingley, Jr., who will probably be califman of the Ways and Means Committee, said: "The Republicans will have to wait the message of the President before they can tell what to do. We are of in a position to put through any detailation without the consect of the Pesident's party in the Senate. But my opinion is that we should pass a bill to provide the necessary revenue to make up the deficit, and the bill should be drawn up on Republican lioes, regardless of any recommendations of the President as to how it should be framed. If the President does not want the revenue let, him take the responsibility.

ITINERANTS' INSTITUTE

Opened at Grace Church Tuesday Evening. The Itinerants' institute of the East The Olibert Opera Company Malne Conference of the Methodist Episcopal church began last evening at Grace The Institute consists of about thirtyfive young men who are pursuing the

of Bishops for candidates for orders in aminers from among the older members the conference. The exercises began at 7 o'clock with a praise service led by Mr. Lucas, in which there were prayer by Rev. Mr. Osgood and pleasing songs by the ladies' quartette of Grace The president, Rev. H. E. Foss, presided:

The address of welcome was delivered by Hon. T. H. Wentworth, of this city, by Hon. T. B. Wentworth, of this city, and it was a cordial and gracefully expressed offering of the hospitality of the city. He said that it was a pleasant duly for him to extend the welcome and

duly for him to extend the welcome and it need not be emphasized, for were they not all brethren in Methodism?

Hetsald there were two things necessary in a well regulated Methodist family—an aliar of prayer and a prophets chamber. They welcomed them the more gladly because they saw in the occasion a movement which indicates an advance, an improvement in the ministry.

La order to succeed in the ministry there must be earnest endeavor and deep consecration. When a young man makes up his mind that he is going to succeed on the past elements of the ministry he is not here to-night—he stayed at home. If there is such an one he had better go consecration. When a young man makes on the past elements of the ministry he is not here to-night—he stayed at home. If there is such an one he had better go to Africa and grow up with the country. The man who would be a leader must be a leader in thought.

Mr. Wentworth hoped that every one present would strive to make the institute succeed.

Prof. C. J. H. Ropes, of the Theological Semifary, delivened the address which was upon the subject "Principles of Bible Study" and an able effort. The first principle was "Read the Bible for instances in which the Bible was missuand give the correct meaning."
